

Division of Air Resource Management (DARM) ASB: Asbestos Application

Overview: The Web-based Asbestos Application tracks the removal and demolition of asbestos from sites around the state. Asbestos provides for efficient review of notifications from asbestos containing facilities, processing of invoices, and searching for contractor information. A multitude of reports, written in ASP, are available. Enterprise 24x7 Inc provides IT consulting services to assist DARM with the completion of Information Technology (IT) service requests. Service requests are related to software applications and systems designed for the support of programs, processes and other activities implemented for the purpose of developing, deploying and maintaining the Asbestos application.
